

- They are purpose manufactured for specific wiping needs, helping minimize lost time.
- Their compact nature allows reduction in storage space and can reduce disposal costs.
- Efficient dispensing systems can help reduce usage by up to 30% versus conventional centre feed products.
- They can help to streamline processes and provide insurance against production downtime because they offer:
 - Protection from process or product contamination.
 - Improved equipment maintenance because you can match the wiper to the task.
 - Reduction in potential worker incidents.
