THE SAFER BOOT

**COMFORT AND SAFETY
THAT KEEPS YOU GOING**

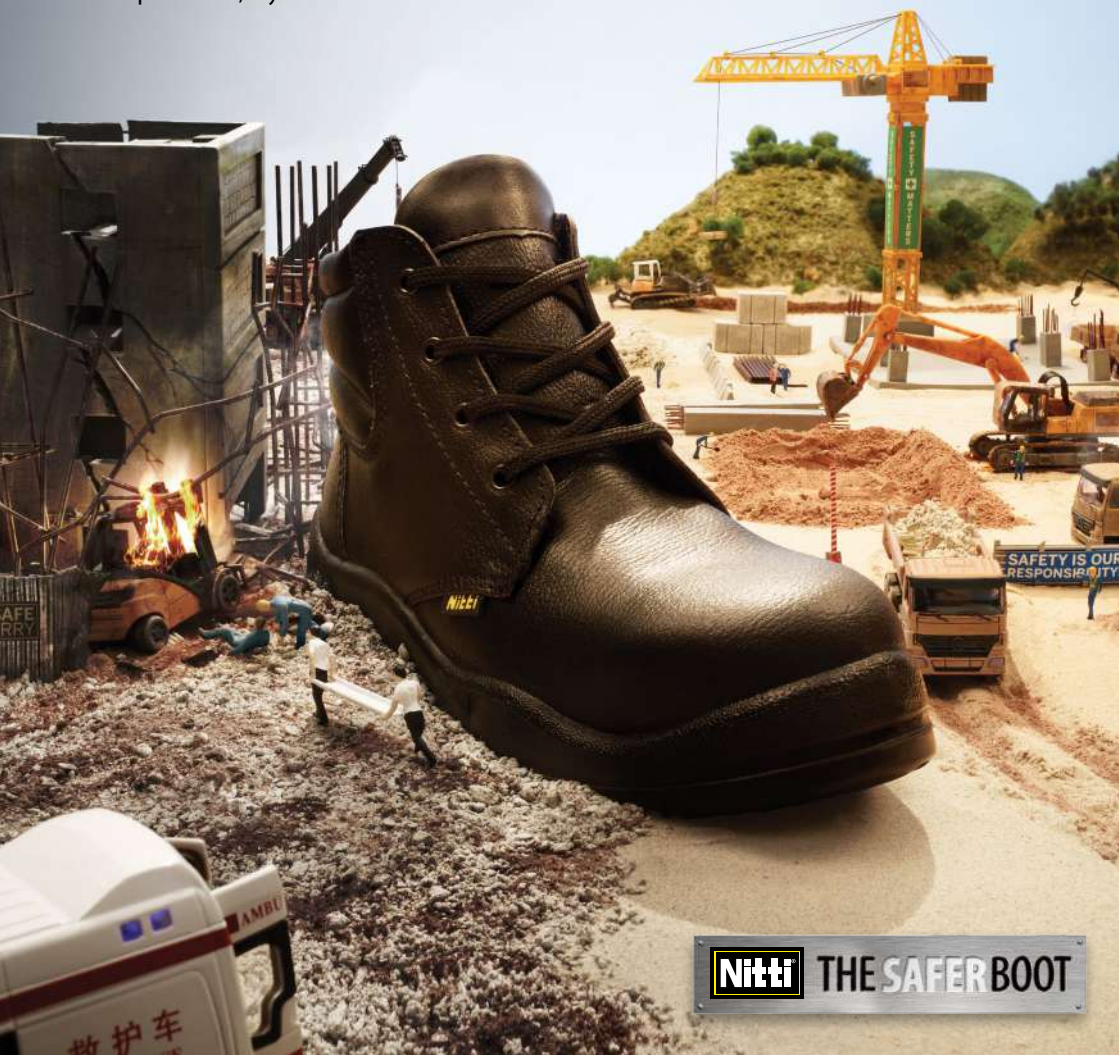

PRODUCT CATALOGUE 2013

A SAFER BOOT MAKES ALL THE DIFFERENCE

AT NITTI, WE ARE TIRELESSLY DEVOTED TO CRAFTING THE PERFECT SAFETY BOOT...

One which has been produced in accordance with the world's highest standards including the European CE EN ISO 20345 standard. A boot which combines our signature quality leather exterior with a technologically enhanced interior lining to ensure breathability, protection, style and comfort like no other boot out there.

Nitti

THE SAFER BOOT

WHY NITTI?

Nitti boots are designed for one thing above all others: your safety. Since its inception in 1996, Nitti has spent years ensuring that our boots more than exceed international safety standards. We keep the boots simple and functional – right down to the smallest parts – so that you are assured of durable footwear that keeps you mobile, comfortable and, ultimately, safe.

Whether you're working in the oil and gas, marine and offshore, construction, mining, manufacturing and industrial, automotive, aerospace, logistics, military or agriculture sectors, Nitti has a boot for you.

THE NITTI STORY

Our mission is simple. Provide clients with quality and cost-effective footwear through innovative technology, superior materials and dedicated people. The end result? Safety and peace of mind for our global customers.

We have the experience and expertise of our parent company, the CEH Group, which gives us access to the best technology for manufacturing safety footwear. Our materials are sourced from all over the world to ensure that only the very best goes into each and every boot. With a dedicated team working around the clock, we are fully committed to the entire process, from crafting our boots to ensuring our clients receive the best quality products at the best prices.

Our philosophy is that if we are committed to delivering the very best safety boots to our consumers, the quality of our product will be, quite simply, all the testimony we need.

'SAFETY AND PEACE OF MIND FOR OUR GLOBAL CUSTOMERS.'

NITTI IS A MEMBER OF THE CEH GROUP

NITTI IS ABOUT PROTECTION

Nitti has spent years on research to ensure that – wherever you are – you feel protected from workplace and environmental hazards when you slip on our boots. Here are the main features of our boots.

NITTI IS ABOUT COMFORT

A unique layered system of quality leather and Cambrelle® comfort lining ensures maximum breathability while being liquid-resistant to the external environment.

Every Nitti Safety Shoe has an ergonomic wide tip toe cap so toes are not constricted by footwear, giving you the comfort and safety for better peace of mind.

The narrow tip toe cap causes toes to bend with pressure, restricting blood circulation in the feet

The wider toe cap eases the pressure on the toes without compromising safety, thereby promoting healthy feet

PRODUCT RANGE

LOW-CUT BOOTS

LOW CUT

LACE

LOW CUT - 21281

Great for all dry work environments. Works hard outdoors, yet looks good indoors, this pair provides great comfort while exceeding the basic safety requirements.

FEATURES

Outsole	Direct Injection Polyurethane
Rating	CE EN 20345-1 S3

SIZE COMPARISON CHART

Everybody's feet are different and every manufacturer and every shoe style might have a different cut. Safety footwear has a different purpose and built than other types of shoes, therefore it is recommended that you try on the shoes to ensure optimal fit.

EUROPEAN	35	36	37	38	39/40	41	42	43	44	45	46	47	48
UK	02	3	4	5	6	7	8	9	10	11	12	13	14
US (Men)	3	4	5	6	7	8	9	10	11	12	13	14	15

SHOE FITTING TIPS

- Do the fitting at the end of the day when your feet are the most swollen.
- Fit the shoes with the type of socks you will wear with them.
- Try first on your larger foot
- Stand up with the shoes on and walk around, the shoes should feel comfortable

KEEP YOUR NITTI BOOTS GOING STRONG

Although Nitti footwear is designed to be worn in even the harshest of work environments, proper care and maintenance will ensure a longer lifespan for your boots and enhanced comfort and safety for you.

BOOT CARE

Clean and polish your boots regularly with wax to enhance its durability. Be sure to rinse your boots with water after contact with cement. Left unattended, cement will damage the leather upper, drying it out and causing cracks to form.

Do not wash your boots. Wet boots should be air-dried naturally at room temperature with the cushion foot bed and laces removed and the boots fully opened. Never force dry or use strong detergents or caustic cleaning agents.

Antistatic properties can be significantly changed by flexing or contamination if worn in wet conditions and with wear over time.

STORAGE

Do not store your boots in direct sunlight. Always air-dry your boots after use and store them in a cool, dry and well-ventilated place.

QUALITY ASSURANCE

Nitti is committed to quality. To that extent, every Nitti boot is put through a series of stringent quality assurance tests to ensure consistent quality that far surpasses industry standards.

Our boots are designed to measure up to and exceed the European CE EN ISO 20345-1 standard on antistatic levels, upper and outsole bond strength, impact resistance and durability.

Every pair of Nitti is backed with an international product liability and a 6-month manufacturer's warranty so that you can trust in the quality of your Nitti boots.
