

EnerTag

Smart Utility Management Solution
Energy | Gas | Water

EnerTag Smart Utility Management Solution is an automated total solution designed to manage tenant utility consumption.

- Connected infrastructure displays real-time data from multiple meters
- Dashboards provide oversight to understand tenant habits
- Print and compare reports

Increase Operational Efficiency

Reduce manual process to key in data for facility consumption

Eliminate Cost Discrepancy

Prevent underbilling with accurate data from smart meters

Effortlessly Generate Reports

Collect real time data from meters instantly and generate reports

Centralised Tenant Software

Manage move-in & move-out dates that reflect real time billing

Advance Sustainability Goals

Gain insights to coordinate sustainability efforts collectively with tenants
